**ShareLife**

# CREIGHTON MODEL *FertilityCare*<sup>™</sup> System

teaches couples to better understand and care for their reproductive health.

*Creighton Model FertilityCare*<sup>™</sup> System teaches couples to better understand and care for their reproductive health. It provides comprehensive, professional services through individualized follow-up, standardized teaching tools and ongoing research.

**NaProTECHNOLOGY**<sup>®</sup> is a medically safe and accurate system that diagnoses and treats reproductive and gynecological problems without suppressing or harming the body's natural system.

## Education Programs

These education programs meet the educational demands of this newly emerging allied health profession while providing a case management approach to teaching.

## Practitioner Program

The 13 month program is the primary program for teachers. There are two education phases, two supervised practical and an On-Site Visit, providing education in both the basic as well as advanced aspects of this System.

Education Phase I (8 days) and Education Phase II (6 Days) takes place at Carter Centre, Aurora, Ontario.

All other educational services are provided through an innovative system of long distance supervision and On-Site Visitation.

## Instructor Program

This is a seven month program, open to persons with less than two years of post high school education. It is designed to provide only basic education in the *Creighton Model FertilityCare*<sup>™</sup> System. These teachers may teach only under the supervision of a *FertilityCare*<sup>™</sup> Practitioner. The training program includes one education phase and one supervised practicum. Only those curriculum items that are previously outlined for Education Phase I and Supervised Practicum I make up the Instructor Program. There is no Education Phase II or On-Site Visit.

## Medical Consultant Program

This is a six month program, designed to assist physicians to incorporate into their medical practices the newly emerging science of Natural Procreative Technology (*NaProTECHNOLOGY*<sup>®</sup>). It also assists the physician to work in a supportive or administrative role with *FertilityCare*<sup>™</sup> Programs. This program involves two education phases and one supervised practicum.

Physicians enrolled in the Medical Consultant Program should understand that the medical applications they will learn are related specifically to the *Creighton Model FertilityCare*<sup>™</sup> System. Therefore, they should plan to have a *FertilityCare*<sup>™</sup> Practitioner available in their area. It is possible for a physician to enroll in a combined Medical Consultant/Practitioner Program; however, this course is demanding, and one must have sufficient time to complete it.

Physicians interested in the Medical Consultant Program must attend EP II at the Pope Paul VI Institute in Omaha, Nebraska.

## The Nurse Practitioner, Midwife, & Pharmacist Programs

*Creighton Model* programs are also offered to Nurse Practitioners, Midwives and Pharmacists. For these programs, see applicant eligibility. These certificate programs include a combination of the *Creighton Model FertilityCare*<sup>™</sup> Practitioner and Medical Consultant Programs. Both certificates - Medical Consultant and Practitioner - will be presented upon satisfactory completion of the Practitioner Program and all Medical Consultant assignments and examinations.

For detailed information of the Education Program see our website [www.fertilitycare.ca](http://www.fertilitycare.ca)
